

~~CONFIDENTIAL~~

13 July 1981

MEMORANDUM FOR: Acting Chief, Classification Review Division

FROM: [REDACTED]

Chief, Intelligence Branch

SUBJECT: Weekly Report (6-10 July 1981) [REDACTED]  
Handling of Compartmented Material in DARE System

1. On 7 July the undersigned accompanied Chief, S&T Branch to a meeting at Headquarters with [REDACTED] of DDS&T to discuss the problems of recording our review action on compartmented material. [REDACTED]

2. Originally, [REDACTED] had objected to our recording some record groups in DARE because of their sensitivity; the material was, therefore, being reviewed and returned to AARC without being entered in our system. I asked for the meeting so that I might explore the extent of the problem and make plans, if necessary, for the development of an auxiliary system to accommodate this and other material of similar sensitivity. [REDACTED]

3. After hearing a description of the DARE system and its security controls, the S&T representatives agreed to reconsider their objections. Several boxes of the records in question have been sent to them for study. They will let us know if we may proceed with input to the present system or if we must hold input until the auxiliary system is developed. [REDACTED]
